

CARVE YOUR OWN PUMPKIN

1. Tape the pattern to a clean, gutted pumpkin.
2. Cut or fold the outside edge of the pattern paper every few inches to keep it flat on the surface of the pumpkin.
3. Use a thumbtack to poke holes through the pattern to transfer outline from the paper to the pumpkin. You will be cutting away the gray.
4. Remove the paper and use a knife or pumpkin carving kit to carve out the design.
